PROFILE

Web developer based in Cebu, working with clients worldwide. I help businesses and startups turn ideas into functional, realistic and scalable solutions, building minimal, fast websites that convert. I started coding in college and now freelance full-time, with a focus on web development, portfolios and e-commerce. Currently open for freelance and full-time remote roles.

EXPERIENCE

Freelance Web Developer

Remote / Cebu, PH · about 1 year

- Built 10+ websites for businesses and startups, including web applications, portfolios and e-commerce.
- Develop with React, HTML, CSS, JavaScript and TypeScript on the frontend, and PHP and Firebase on the backend.
- Design interfaces and prototypes in Figma, Draw.io and Webflow; deploy with Git, GitHub and Vercel.
- Available for new projects and typically respond within 24 hours.

SELECTED PROJECTS (2024 - 2026)

Movie Watchlist Web App

PHP · MySQL · JavaScript

Interactive software application that lets users search, organize, and track films they want to watch or have already finished.

Live: movie-watchlist.page.gd | Source: github.com/.../Movie-Web-App

Stay Hub Website

PHP · Laravel · MySQL

Online platform that connects tenants with boarding house and dormitory owners to search, compare, view room details, and book accommodations remotely.

Live: stayhub.ifree.page | Source: github.com/.../Room-Reservation-Website

Bike Vault Concept

PHP · MySQL · JavaScript

A conceptual web application for managing and tracking bicycle inventory and maintenance schedules.

Live: bike-vault.site.je
