PROFILE

Web developer based in Cebu, working with clients worldwide. I help businesses and startups turn ideas into functional, realistic and scalable solutions, building minimal, fast websites that convert. I started coding in college and now freelance full-time, with a focus on web development, portfolios and e-commerce. Open to freelance and full-time remote roles.

EXPERIENCE

Freelance Web Developer

Remote / Cebu, PH · ~1 year

- Built 10+ websites for businesses and startups, from portfolios to e-commerce stores and dashboards.
- Designed and developed responsive, performance-focused interfaces with React, TypeScript, HTML, CSS and JavaScript.
- Delivered UX case studies and clickable prototypes in Figma before development.

SELECTED PROJECTS

Finora — Finance Dashboard

React · TypeScript · Chart.js

React dashboard with real-time analytics for a fintech startup.

Noir — Clothing Store

Shopify · Liquid · GSAP

Minimal Shopify store that increased conversion by 32%.

Cebu Eats — App Redesign

Figma · Prototype · UX

UX case study and mobile prototype for a local food delivery app.
